

VALKYR, THE SHADOW PROTOCOL

(For Qualified Investors & Fellowship Partners Only)

THE INEVITABLE SHIFT

Personal safety is a \$12B market built on a broken assumption. Campus security spends \$18B. Remote monitoring is \$60B. None of it is autonomous.

We are not entering a market. We are replacing it with infrastructure.

THE LIE THAT KILLS

70% of assault victims freeze. Biology shuts down fine motor control.

Every device on the market, pepper spray, apps, panic buttons, assumes she has a free hand and a clear mind. She has neither. The industry sells the illusion of control while women pay the price.

THE ONLY WEAPON THAT WORKS WHILE YOU FREEZE

Valkyr is a biometric cuff that acts before conscious thought. Five-sensor fusion reads the body's fear signature, heart rate, skin response, temperature, motion, and ambient threat audio.

In 4 seconds, with zero touch:

1. Pulse Confirm: She feels help moving
2. 118 dB directional deterrent: Disorients the attacker
3. GhostVoice: Decoy audio blasts from her phone
4. The Legion: Nearby cuffs receive ultrasonic distress signals and converge

THE COMPOUNDING DEFENSE

Every threat encounter becomes a Shadow Token, anonymized, encrypted, uploaded. The FearPrint model learns. A stalker pattern in Austin protects a woman in Chicago three weeks later.

This is not a device. It is a network that gets stronger every time someone wears it.

Hardware clones in 90 days. Dataset clones in 18 months. By then, the Legion owns the grid.

THE FORTRESS

What €500K from EWOR Converts Into

We do not spend this money. We convert it into compounding assets.

- 120-woman biometric study (Fitzpatrick I–VI) → Proprietary dataset moat
- 25 beta units + 20-unit live pilot → Proof of architecture
- 3 provisional patents → Locked IP
- Ironclad university SRA → 100% data ownership
- August LOI pipeline → 300-unit institutional pre-commitment

THE ECONOMICS

We acquire subscribers through hardware. Housing complexes buy at €99 landed cost
We own the €24.99/month Guardian subscription for life.

- Institutional CAC: €0
- Guardian LTV: €960
- LTV:CAC: Infinite on bulk

THE PATH

Year	Users	ARR	Milestone
1	1,000	\$242K	4 properties, proof of bundle
2	14,000	\$3.6M	National housing partnerships
3	52,000	\$12.1M	Proprietary monitoring center
4	100,000	\$24.1M	Urban Shadow Grid
5	250,000	\$56.8M	Strategic exit or Series C

THE OFFER

- Raising €1M Seed. Seeking €500K lead from EWOR.
- Phase 1 builds the fortress. Phase 2 collects the rent.

THE CLOSE

You don't invest in gadgets. You invest in infrastructure that learns.

In 18 months, the Shadow Grid will be live, the dataset will be 10x deeper, and the institutional pipeline will be locked.

The only question is whether you own the first 250,000 nodes, or you watch someone else do it.

This round has 4 spots.

Are you in?
